

I created this template based on the Stampin' Up! Mini Treat Bag Thinlits which are now retired.

I love this little pocket treat bag and even though I still have these SU! thinlits, I decided to create a template for my customers who do not have them but would like to create a similar treat bag.

Project Recipe:

1. Cut desired DSP or card stock at 6" x 8 1/2". You will want to pay attention to any images on your paper and cut so that your finished pocket shows images right side up. Also, decide which side of DSP will be on the outside.

With the outside side of the paper facing up:

On the long side, score at 2 1/4" and 6 1/4".

On the short side, score at 1/2" and 5 1/2".

Fold and burnish on all your score lines.

You will need to cut away parts of the 1/2" outer sections. See the photo on what sections to cut away.

2. This is what your pocket will look like with the cutout sections removed.

3. Lay your pocket out with the outside pattern facing up and add Tear N Tape to the tab on center bottom.

4. Flip your pocket over and add Tear N Tape to the right side, as shown in the photo.

5. Fold the center bottom tab up and remove the plastic covering on the Tear N Tape.

Fold the left side of the pocket to the right so it adheres to the center bottom, as shown in the photo.

Now remove the plastic covering from the right side of the pocket and fold the right side to the left, adhering it to the center bottom and the back left side.

6. That's it! Your pocket treat bag is finished. You can now decorate it as desired.
